

# Classic Ceiling Fans by Lost Canyon Woodworks

719.689.3035    [www.lostcanyonwoodworks.com](http://www.lostcanyonwoodworks.com)

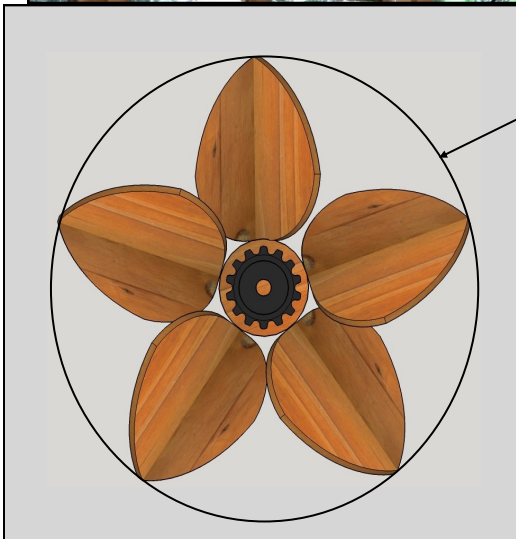

We specialize in custom-made ceiling fans:

- Virtually any length from 10 feet to over 50 feet.
- Any number of hubs with 3, 4, 5 or more blades per hub.

- A wide variety of fan blades are available including Bamboo, Palm Leaves, Composite, Wood, and custom shapes.

The diameter of the blade/hub unit can vary from as small as 22" to 60" or more.

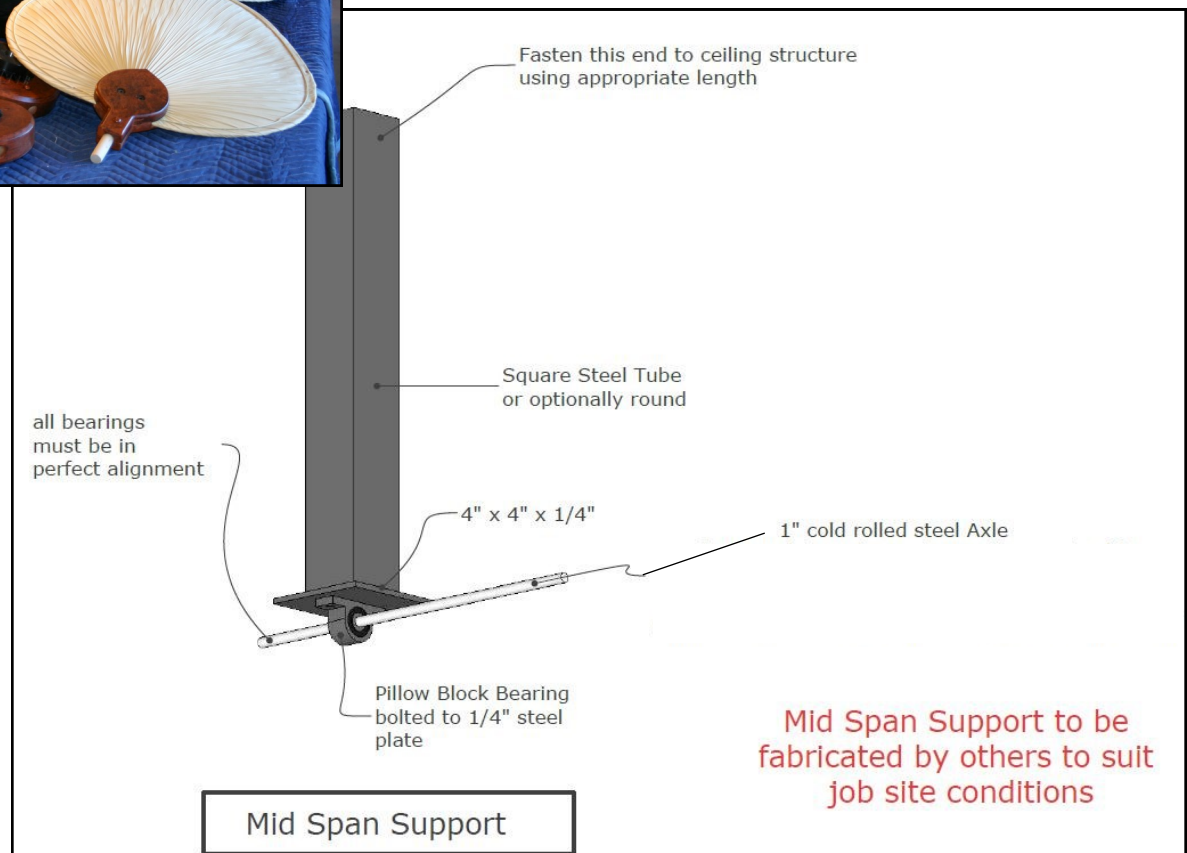

All fan units are powered by an industrial looking 120 volt motor unit, controlled by a switch mounted in a convenient location. The motor is UL listed and rated for continuous use. It can be installed on a shelf so it is visible or behind a wall in a hidden location. The fan circulates at approximately 12 RPMs.

Each fan unit is shipped complete with everything needed for installation except any mid-span supports and the 1 inch steel axle.

Mid-span supports need to be provided every 10 feet and fabricated by your installation team to suit job site conditions. The axle is best purchased locally to save on shipping costs, especially if you require a long length. We also can

include the axle in the package depending on your configuration.

## Blade Selection Examples

Woven Bamboo—Tan

Woven Bamboo—Brown

Composite Palm Leaf

Woven Bamboo—Composite

Carved With Walnut Finish

Wood with Walnut Finish

Custom wood—many styles possible

Custom wood—Custom Shape
